## Make the most out of your favorite memories!

## No Coating required !

1. Feed one sheet of decal paper into the printer or copier and design the crafts on your computer.

2. Print on the glossy side of the blank paper
   – Paper Option: Heavy Glossy or similar.

3. Cut out your image(s) with a pair of scissors and place the cut out in water for approximately 1 minute.

4. When the clear film begins slide off the backing paper, transfer the film onto the surface you choose. If the image is big, it is recommended to slide off the backing paper from the surface of your item.

5. Wipe off excess water from your decal transfer using gentle strokes with a soft rubber scrubber or wet tissue. Allow to set dry for approximately 3 hours.
