

Water-Slide Ink-Jet Decal Paper (Waterproof)

★ Description

Make your own decal paper at home. Using your personal computer and inkjet printer, it is easy to make your own water slide decal paper. It can be printed by your personal inkjet printer. You **don't need any spray coating** for this paper. You can put the decal on ceramic, glass, metal, soap, candle, etc.

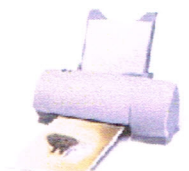

Weight : 170gsm Size : A4 (5 sheets) Color : Clear

Make your style by yourself!!

★ HOW to Use

1. Edit the images or photo which you want to create on your computer.
2. Load your ink jet printer with your ink jet printable decal paper.
3. Under printer properties, select 'Plain paper' or a similar option.
4. Print the image from your computer onto your ink jet printable decal paper with your ink jet printer.

5. Wait until the image is completely dry.
6. Cut out the image you want with scissors.
7. Place it in water for about 60 seconds and then transfer it onto surface of material you wish to decorate. Wipe excess water off your decal transfer using gentle strokes with a rubber Scrubber or wet tissues.

8. Allow to set dry for approximately 3 hours. Now it is ready to use.
9. Baking at around 80°C for 10 minutes will strengthen the adhesion.

If you want better gloss and hardness, you can spray the top coat over and over. If you want to put the decal on a dark color surface (such as black, cobalt blue, choco brown) we suggest you use our white decal paper instead of this product.
